### *Telstar Cold Foil Mounted on a 20" Allied Press*

The Telstar Unwind and Rewind features a multi-puck pneumatic unwind brake and multi-puck rewind clutch, both with LOCO facings for smooth and steady draw on foil webs from 4" to 20". The rewind shaft is independently driven with a variable speed motor. Outboard support arms maintain parallelism on full rolls. The pneumatic nip features a regulator for both front and back air cylinders for evenly balancing the nip pressure. The unit can be easily re-sequenced for various job requirements.
