## Telstar's Hot Melt Pattern Printer on a 22" Comco Press Stretch

Our servo-driven stand-alone unit prints patterns of hot melt adhesives at production rates to 250 FPM. Five heated zones are constantly monitored for consistency. Precision metering adjustment assures uniform coat weights up to 50 microns. The unit can be mounted to nearly any press or converting line. Applications include pill cards, wrist bands, business forms, and liner-less labels.
