Our Loop-Over Turn Bar Gives You a Quick Way to Make a Quick Turn

Create instantly redeemable coupons or place one web on top of another with the addition of a Telstar Loop-Over Turn Bar unit on your label press. The unit can be independently mounted or clamped into a press die station. Our system allows web printing of two prime labels side by side with one being de-laminated, looped over, and placed on top of the other within coupon tolerance alignment. Rotational adjustment plus our unique adjustable clamshell design for final placement of one web upon the other make Telstar Turnbar a valuable retrofit opportunity at an affordable price for any new or existing press.
